CHAIRMAN'S MESSAGE

- Khalid Humaid Hassan Al Khatri as a Chairman of **SHUAA ALFATH** has the strength of legacy & the spirit of ambition to leverage the opportunities in quality, speed & value in delivering projects to clients over the years.
- Adding value to clients in what **SHUAA ALFATH** Golden Trading is all about. Our uniqueness lies in understanding & delivering cost effective borewell drilling solutions to developers, consultants, contractors & clients.
- Opportunities are opening up for short-term & long-term Borewell Drilling projects, which leads **SHUAA ALFATH** to encourage reliable & efficient methodology of Borewell drilling by terming the slogan of **SHUAA ALFATH** as "Reinventing Borewell drilling."
- As a company we invest long-term in our engineering capabilities & hone human skill development. Together with our people, we will continue to inspire progress that will build meaningful values, sustainable innovations for our future generations.
- Our people are the heart of what we do and **SHUAA ALFATH** is one among the innovative value driven solution provider, something we are particularly proud of.

SYED KAMAAL SABA

GENERAL MANAGER

Kamaal has nearly Eighteen years of experience as a construction professional. After his graduation as a Civil Engineer he joined Multinational Groups in UAE putting the foundation stone for Supply Chain Department. During his 18 years of stay in UAE he went up the corporate ladder to become Supply Chain Manager for Al Rajhi Investment & later hold a senior position in supply chain in Shapoorji Pallonji in Oman.

During 18 years of experience in UAE, Kamaal has successfully orchestrated Supply Chain and delivered over 100 projects with an approximate total value of AED 1 billion. The following are some of the Major Projects :

- Oman Across Ages Museum – Nizwa – Sultanate of Oman
- 325 Room Hilton Ras Al Khaimah Hotel, a turnkey project with a BUA of 37,000 sqm and 26,000 sqm facilities
- 389 Warehouses with a built-up area of 37,376 sq.m
- Staff accommodation with a built-up area of 24,134 sq.m
- Millennium Hotel at Garhoud for Saeed Al Naboodah Group
- 10 Storey Smart Office Building with a built-up area of 19,500 sq.m

Hilton Beach Hotel at Ras Al Khaimah UAE

Oman Across Ages Museum – Nizwa Sultanate of Oman

SHUJAUL HAQUE

HEAD – BOREWELL DIVISION

Shajaul Haque has worked on a wide range of water well drilling projects in Oman. With a degree MTech in Petroleum Geology, Shajaul Haque expertise lies in operations, project management.

Shajaul Haque has worked with many multinational companies like **Easter Oversees L.L.C., Muallam Desert L.L.C., House of Trading & Services**. In the Geological Industry & drilling activities, construction and completion of water wells and production, Monitoring and observation of wells.

Major Projects Executed

1. 1. Drilling of an injection well at STF, ROP-Al Qurum, M/S House of Trading & Services LLC2. Rehabilitation of five number deep wells (350 m) at Nejed, Hilat Al Raka, M/S Tawoos Agriculture Systems LLC.
2. Drilling of production bore Wells 600 m deep 3 No. at Wilayat Mirbat, Directorate of Water Supply Department, Salalah.
3. . Drilling of a production bore holes 350 m deep 1No. at ASaffa Farm, M/S ASaffa Foods SAOG.
4. Drilling and contraction of water supply wells 2 number 400m depth at Ruba Al Khali, Royal Oman Police.
5. Rehabilitation of Al Kamil well field, Sharqiyah, Al Manarah.
6. Drilling of production well at Shelim. Dhofar **Municipality**.
7. Drilling of 20 productions well and aquifer testing prograded of Directorate general of million date palm plantation projection **arid climate**, Diwan Royal Court at Al Qabil and Wadi Ajran, Oman.
8. Drilling of deep and shallow 12 Production wells, Directorate of Water Supply Department, Salalah, in different areas of Dhofar and Sohar region. Muscat, Adam, Nizwa, Abu Khela, Salalah, Hasik.
9. Drilling of an injection well at STF, ROP-Al Qurum, 13 wells project in different areas of Dhofar and Sohar regions.

SECTION 2

INTRODUCTION

SAG GROUP

INTRODUCTION

SHUA'A ALFATH is Oman leading independent Borewell and construction Company with vast experience based in Muscat. Since our inception we have been engaged in various prestigious projects in the Sultanate of Oman.

SHUA'A ALFATH overall aim is to reinvent Borewell drilling & meet our customer's needs with the best possible service levels with total quality equipment within HSE requirements at a highly competitive level of pricing.

We can execute projects to meet client/consultant/contractor demands. Our team is equipped with end-to-end activities for proper surveying, operations & handing over to clients. We have a house workshop facility with a team of qualified mechanics for all kinds of service for repair and maintenance to avoid downtime & loss of working works.

Customer satisfaction & value addition is always our top priority in borewell drilling works. HSE, Engineering, Quality, Speed & Reliability are the corner stones of our business sustainability.

Committed, Dedicated & Motivated workforce is our biggest assets. We are continuously driving forward in technical ability & Methodology in line with the latest borewell construction requirements.

VISION

To provide complete solutions & to be recognized as a company that is reliable, tailored solutions to meet customers' demands coupled with outstanding service. We always aim to provide our staff with continual training and development to bring out the best in them and provide a sustainable future.

MISSION

We consider each customer's requirements on an individual basis, providing site survey through to handover, ensuring we deliver excellent service and support throughout. We take in pride in our equipment and ensure it operates to maximum efficiency and without environmental impact. We maintain our fleet to the highest standard. Equipment is continuously renewed, meaning a modern fleet of equipment will pass efficiency savings onto the customer whilst protecting the environment.

OUR VALUES

Deliver a tailored solution to all customers. Build and maintain long-term relationships with customers. Safety is integral in any project, process, and people. The staff is friendly, professional, and knowledgeable. Innovation is an ongoing process SHUAA ALFATH has built its reputation upon its Values. We set out our behaviours, our culture and highlight how we should operate within our business. Everyone in SHUAA ALFATH understands the importance of these Values and we strive to ensure that these principles are constantly applied across our business.

OUR COMMITMENT

We consider each customer's requirements on an individual basis, providing site surveys through to handover, ensuring we deliver excellent service and support throughout.

We take pride in our equipment and ensure it operates to maximum efficiency and without environmental impact. We maintain our fleet to the highest standard.

Equipment is continuously renewed, meaning a modern fleet of equipment will pass efficiency savings onto the customer whilst protecting the environment.

CODE OF BUSINESS CONDUCT AND ETHICS

THE GROUP POLICY STATEMENT

Honesty, Respect, Trust, Customer Focus, Teamwork & Communication are the core values that distinguish SAG Group as leading Borewell drilling & Contracting Company.

SAG Group will conduct its business fairly, impartially, in an ethical and Proper manner & full compliance with all applicable laws and regulations. In conducting its business, integrity must undermine all company relationships Including those with customer, Suppliers, Communities and among employees.

The highest standards of ethical business conduct are required of "SAG Group" Employees in the performance of the company responsibilities.

"SAG Group" employees do not engage in conduct or activity that may raise question as to the company's honesty, impartiality or reputation or otherwise cause embarrassment to the company.

Every employee has the responsibility to ask questions, seek guidance, and report suspected violations of the Code of Conduct retaliation against employees who come forward to raise genuine concerns will not be tolerated.

ENTERPRISE RESOURCE PLANNING SYSTEM

Enterprise Resource Planning, which is commonly known by its abbreviation ERP, is the integrated suite of business application to collect, store, manage, interpret, and analyse data from many business activities. ERP software suite runs on a common database, eliminating chances for repeated data entry and duplicate data.

SHUA'A ALFATH functions on ERP software suite for integrating various departments and functional areas across the Group. This ERP software enables real time synchronization of key enterprise functionalities such as Accounts and Finance, Human Resource, Sales and Marketing, Procurement, Project Costing, Customer Relationship, and Cost Control.

This company wide integrated information system supports **SHUA'A ALFATH** Group to perform daily business activities as consistent as possible, delivering superior customer experience thus building strong brand equity.

SHUA'A ALFATH

REINVENTING BOREWELL DRILLING

SECTION 3

SUSTAINABILITY

CORPORATE HEALTH, SAFETY, AND ENVIRONMENTAL (HSE) STATEMENT

SHUA'A ALFATH is committed to providing a safe and healthy workplace for all persons involved in or affected by its operation.

SHUA'A ALFATH recognizes the responsibilities and requirements placed upon it by occupational health and safety legislation and will comply with all applicable laws and regulations.

We will strive to achieve our objectives by:

- Making safety an integral of our business activities.
- Introducing a risk management program to identify and control hazards.
- Ensuring that our work team is committed to our goals by providing adequate education, training, and supervision.
- Continuously reviewing the adequacy of our safety management system to ensure it remains effective.

Management is expected to fully implement our Health and Safety systems and are responsible for ensuring a safe work environment is provided for all persons under their direct control.

Management is also expected to address promptly and adequately any health and safety issues they become aware of Health and Safety.

Employees are accountable for complying with safety policies and instructions as well as reporting incidents and concerns to **SHUA'A ALFATH**. Employees shall actively participate in following procedures outlined in HSE Management Plan

FINANCIAL INFORMATION

FINANCIAL INFORMATION

SHUA'A ALFATH follows the International Accounting Standards and Practices forth by IASD and produces financial statements every year. Currently **SHUA'A ALFATH** enjoys a healthy relationship and maintains international banking facilities with the following banks:

- Bank Muscat
- Ahli Bank
- Meethaq Bank

SHUA'A ALFATH realizes the importance of analyzing Company's financial position and has a clear understanding of how its business is doing financially.

For us to be able to predict and plan for the future, a fairly thorough understanding of financial statements, is essential. A sound understanding of financial statements will;

- Identify unfavourable trends and tendencies in the operations of business.
- Monitor cash flow requirements on a timely basis, and identify financing needs early.
- Monitor important indicators of financial health.
- Monitor periodic increases and decreases in the financial position.
- Monitor performance against **SHUA'A ALFATH** developed financial plan.

SHUA'A ALFATH

SECTION 5

GROUP OF COMPANIES

SAG GROUP OF COMPANIES

REGIONAL PRESENCE

SHUA'A ALFATH has earned its reputation across the various Governorates of the Sultanate of Oman for delivery of projects known for their high quality and cost effectiveness.

Based in Ghala Muscat Sultanate of Oman **SHUA'A ALFATH** is a general contracting and borewell, construction management company which specializes in design and build projects and borewell construction work. With its experience covering everything from pre-construction services to complete turn-key borewell construction projects.

SHUA'A ALFATH is ranked among the top Contractors in the region with its substantial experience in bringing difficult and sensitive projects to successful completion with high quality standards.

CORPORATE OBJECTIVES

SHUA'A ALFATH Group has enjoyed numerous recognized achievements within a short period of time as a **Total Solution Provider** for all types of borewell construction requirements by organizing our talents and resources into the subsidiary companies specialized in various field of borewell construction.

The corporate aim has been consistent since the launching of the Group. The Group focus and value reputation for integrity, technical excellence, and customer satisfaction, as well as professional success and development of its employees.

The principal objective is to:

- Govern the uniform conduct, policies and procedures for the Group companies and ensure their compliance with them.
- To maintain and further enhance the quality of services, by introducing the most sophisticated technology and automated monitoring systems throughout the Group in each level.
- Institutionalize the corporate training programs to ensure effective development of the Staff members and through orientation of new employees.
- Improve the efforts to hire qualified and talented individuals with strong technical, management and business development credentials and vast experience to support and accelerate Groups' growth.

When these objectives are combined with Group Vision and Mission the formula for success is realized. Looking forward to the future we strive to achieve increase in our size, capabilities, and our contributions to borewell construction industry.

WHAT WE DO

WHAT WE DO

- Borehole drilling
- Well construction (includes placement of filter pack, casing, screening)
- Well development (pumping Air into the well to increase yield of well by cleaning screens and aquifers and removing debris that introduced during construction of the well)
- Pump testing to identify well yield
- Well completion (includes surface grouting, placement of permanent pump and pipes, well house)
- Preparation of geophysical study reports and well construction logs
- Geophysical and Geotechnical Survey.
- Supply and installation of submersible pump.

BOREWELL FOR WATER

Specification of Truck Mounted Water Well Drill RIG DTHR 600

Description:

- **UNIT I: Multipurpose Drill Rig Model JCRDTHR-600, Mounted on 6x4 AS DIESELS truck Model 2523, with a top head drive.**
- **UNIT II: Support Truck Mounted on AS DIESEL 2516 EURO IV, 6x4, loaded with Atlas-cop-co compressor Model XRV1350, along with provision to carry drill rods, air hose with real capacity of 30 meters, water/diesel tanks of 2500 litres capacity.**
- **CAPACITY:** The rig is capable of drilling 600 meters.
- **DTH Method:** 150-250mm diameter to a depth of 600 meters in hard rock and abrasive formation.
- **Rotary Drilling:** 7 7/8" to 16" diameter hole to a depth of 600 Meters with Tricone Bits by mud rotary (Direct Rotary) method by reaming in alluvial / sandy, soft medium and collapsible formation (Note: Under Favourable Conditions Only).
- **MAST:** The mast is of Box type and made of heavy duty welded construction, reinforced with suitable cross members, capable of withstanding all types of drilling loads. **The Mast is capable of handling 6 meter (20') long drill pipe and 6-meter-long casing pipe.** The rig is provided with the level indicators for proper levelling. The mast is raised and lowered by means of suitable capacity TWIN hydraulic cylinders, **DANFOS Make Model OMV 400.** The mast is equipped with sufficient capacity lighting arrangements to help night drilling. Mast can handle 40-tons capacity.
- **TOP DRIVE ROTARY HEAD:** Hydraulically operated top drive rotary head fitted with heavy duty mud swivel for mud rotary application powered by TWIN Hydraulic motors and having variable speed range of 0-90rpm and capable of developing a torque of about 750KGM is provided. Suitable arrangement is made on the rotary head to absorb shocks while drilling and also to avoid damage to drilling pipe/spindle tool joints (threads).

RIG 1 - RD-20 RANGE III, ATLAS COPCO

DRILLING RING NO 1:

DESCRIPTION:

1.	Manufacturer	: Atlas Copco
2.	Year of Manufacturer	: 2007
3.	Model Name	: RD-20 Range III
4.	Series No.	: 21153
5.	Mast Rating	: 120,000 Lbs.
6.	Safe Working Load	: 110,000 Lbs.
7.	Max. Torque of Rotary	: 7,655 N.m
8.	Pull down capacity	: 110,000 Lbs.
9.	Pull back capacity	: 120,000 Lbs.

DETAILS OF AIR COMPRESSOR 1250/350 (RIG MOUNTED)

1.	Manufacturer	: Atlas Copco
2.	Year of Manufacturer	:2007
3.	Model No.	:CCC HR 2.5
4.	Type	:Double stage, screw
5.	Delivery	:1250 CFM
6.	Max. working pressure	:350 psi (17.6 bar)

Note: Capable to drill 1500 meters

RIG 2- INGERSOLL-RAND T4W DH DRILL RIG

DRILLING RING NO 2:

DESCRIPTION:

- 2001 Ingersoll-Rand T4W DH Drill Rig – Serial Number:7620
- IR 900cfm / 350 psi Air Compressor
- CAT 3408 Diesel Deck Engine
- Spur Gear Head
- 70,000 lbs. pullback
- Hammer Oilier
- Hour Meter Shows 6,228 Hours
- CAT water Injection
- 3 Hydraulic leveling jacks
- Mounted on a CCC (Crane Carrier Company) Truck
- CAT 3306 Diesel Engine

Note: Capable to drill 400 meters

WATER WELL DRILLING DEPARTMENT

Our Water Supply & Well Drilling Department performs services of water well construction and all associated works. Well drilling construction services consist of following works.

- Borehole drilling in several sizes.
- Well development (Placement of filter pack, casing, screening and pump testing)
- Well construction (Placement of pump, piping, surface grouting, well house)
- Preparation of geophysical study report and well construction logs.

DEPARTMENT STRUCTURE

Our water Supply & Well Drilling Department has qualified engineers, drilling technicians.

GOALS:

- Reconstruction and rehabilitation of Bore Well.
- Providing modern facilities, equipment, and materials.
- Upgrade the level of rebuilding according to the level of the developed countries.

WELL DRILLING METHODOLOGY

Water well construction mainly well process.

WELL CONSTRUCTION PROCESS:

- Borehole drilling
- Well construction (includes placement of filter pack, casing, screening)
- Well development (pumping Air into the well to increase yield of well by cleaning screens and aquifers and removing debris that introduced during construction of the well)
- Pump testing to identify well yield
- Well completion (includes surface grouting, placement of permanent pump and pipes, well house)
- Preparation of geophysical study reports and well construction logs

BORE WELL DRILLING:

SHUA'A AL-FATH uses the biggest rotary drilling machine (capable to drill up to 1500 meters) in OMAN for deep well drilling. The direct rotary drilling method enables us to increase drilling speeds to reach greater depths in most formations. The borehole is drilled by a rotating bit and the waste material is removed by the special mud circulation system that also penetrates the formation to maintain the well wall non permeability. The drilling bit is attached to the lower end of the string of the drill pipe, which transmits the rotating action from the rig to the bit. In the rotary system, drilling foam/mud is pumped down through the drill pipe and out through the ports or jets in the bit carrying the waste material in suspension to the surface. The components of the rotary drilling machines are designed to serve two functions simultaneously operation of the bit and continuous circulation of the drilling foam/ mud. Both are indispensable in cutting in maintaining the borehole.

WELL CASING:

Well casing serves as a lining to maintain an open hole from ground surface to the aquifer. To restrain extension water penetration to the well, it also provides structural support against caving materials outside of the well. Materials that will be used for well casing are PVC pipes that are specially designed for depth of wells and Black steel ASTM A53 Standard casing which can be installed in the wells. Joints normally consist of threaded couplings. Surface casing is installed from ground surface through upper strata of unstable or fractured materials into a stable end, if possible, relatively impermeable material. Such surface casing serves several purposes.

Including: supporting unstable materials during drilling, reduce the loss of drilling mud, facilitating installation or removal of other casing, aiding in placing a sanitary seal, serving as a reservoir for gravel pack.

CEMENTING

The term cementing includes the entire operation of mixing and injecting the grout. Grouting well casing involves filling the drilled hole with a suitable slurry of cement and water, is commonly used but paddled clay can also be used, if used at depth where drying and shrinkage of mud will not occur and where water movement will not wash away the clay particles. If the well construction includes both inner and outer casing, grout is placed between and outside the two casing.

WELL SCREENS

Well screens serve in two basic functions. First, they support the sides of the hole in unconsolidated or fractured grout thereby preventing collapse. Second keeps sediment out of the well while still offering the largest practical open area in the aquifer to minimize resistance to flow, the materials can be PVC or Stainless steel.

GRAVEL PACK MATERIALS

Permits use of large screen slot with a maximum open area provides an annular zone of high permeability, which increases the effective radius and yield of the well. We will use the size of gravel pack materials that are compliant with standards.

WELL DEVELOPMENT

Well development defined as treatment of a well by mechanical, chemical or other means for the purpose of removing an underground resistance flow. The term well development is sometime called groundwater or aquifer development it is the general process of drilling a well to make an aquifer available for water supply. Development usually takes places as soon as the drilling of the well is complete and borehole is put into supply, the general objective is to repair any damage the aquifer caused by the drilling process to obtains maximum production efficiency.

PUMP TESTING

Performs pump testing prior to completion of well to identify the well yield and recovery. The common reasons for pump testing are to determine the hydraulic characteristics of the aquifer and the regional pattern of the groundwater flow. To investigate the effects of the design abstraction rate on the water level in the aquifer and environment in general. To determine the aquifer loss, well loss and efficiency of the well. To determine the perennial yield of the well. To determine the future operational set up the well.

PREPARATION OF REPORTS AND LOGS

Prepares geophysical study reports and well construction logs following completion of well construction works. These reports and logs help our clients to a better understanding of the ground specifications and aquifer locations. Not only the aquifer locations but also the key parameters such as well depth, screen locations, pump location, well yield and pump testing results included in these well construction logs.

To check the validity and authenticity of the digitally signed documents and certificates, please check the online service of National Digital Certification Center at (www.oman.om/tam).

The information in this commercial registration is registered based on the Commercial Registration Law No. (3/1974). The commercial registration owner is obligated to obtain the approval of the competent authorities before the commencement of any economic activity when the activity is restricted by prior consent, including the introduction and operation of foreign labor force.

This certificate proves that this commercial registration has a membership of Oman Chamber of Commerce and Industry for only one year from registration date.

The Commercial Registration and the CR certificate are not considered as an approval or a warranty for a license of bringing in labour.

The Commercial Registration does not grant an approval or a guarantee for obtaining an investor's residence permit in the Sultanate of Oman.

ملاحظات:

هذه الشهادة موقعة رقمياً.

تم توقيع واعتماد هذه الشهادة باستخدام خاصية الشهادات الموقعة رقمياً وفقاً لما هو وارد في قانون المعاملات الإلكترونية لسلطنة عمان والصادر بموجب المرسوم السلطاني رقم (69/2008).

يرجى التحقق من صلاحية ومصداقية المستندات والشهادات المصدقة رقمياً عن طريق الخدمات الإلكترونية المقدمة من المركز الوطني للتصديق الإلكتروني وذلك عبر الرابط (www.oman.om/tam).

تم قيد المعلومات بهذا السجل بموجب قانون السجل التجاري رقم (1974/3). ويستلزم على مالكه الحصول على موافقة الجهات المختصة قبل مباشرة أي نشاط اقتصادي متى كان النشاط مقيداً بموافقة مسبقة بما في ذلك استخدام وتشغيل القوى العاملة الوافدة.

شهادة السجل التجاري تثبت أن هذا السجل منتسب لغرفة تجارة وصناعة عمان لمدة عام واحد فقط من تاريخ التسجيل.

لا يعتبر تسجيل السجل التجاري وشهادة السجل التجاري موافقة أو ضماناً للحصول على ترخيص باستقدام قوى عاملة وافدة.

لا يعتبر هذا السجل التجاري موافقة أو ضماناً للحصول على ترخيص إقامة المستثمر بالسلطنة.

The Commercial Registration is not considered as an approval or a warranty for a license of bringing in labour.

لا يعتبر هذا السجل التجاري موافقة أو ضماناً للحصول على ترخيص باستقدام قوى عاملة وافدة.
