THE MANAGEMENT

CHAIRMAN'S MESSAGE

- Khalid Humaid Hassan Al Khatri as a Chairman of **SHUAA ALFATH** has the strength of legacy & the spirit of ambition to leverage the opportunities in quality, speed & value in delivering projects to clients over the years.
- Adding value to clients in what **SHUAA ALFATH** Golden Trading is all about. Our uniqueness lies in understanding & delivering cost effective surveying solutions to developers, consultants, contractors & clients.
- Opportunities are opening for short-term & long-term infrastructure projects, which leads **SHUAA ALFATH** to encourage reliable & efficient methodology of surveying by terming the slogan of **SHUAA ALFATH** as “Surveying Experts”
- As a company we invest long-term in our engineering capabilities & hone human skill development. Together with our people, we will continue to inspire progress that will build meaningful values, sustainable innovations for our future generations.
- Our people are the heart of what we do and **SHUAA ALFATH** is one among the innovative value driven solution provider, something we are particularly proud of.

Khalid Humaid Hassan Al Khatri

SECTION 2

INTRODUCTION

SAG GROUP

INTRODUCTION

SHUA'A ALFATH is Oman leading independent Earthwork Company with vast experience based in Muscat. Since our inception we have been engaged in various prestigious projects in the Sultanate of Oman.

SHUA'A ALFATH (Surveying Works Division) overall aim is to revolutionize Surveying works with our experienced team of experts & meet our customer's needs with the best possible service levels with total quality equipment within HSE requirements at a highly competitive level of pricing.

We can execute projects to meet client/consultant/contractor demands. Our team is equipped with end-to-end activities for proper surveying, operations & handing over to clients. We have a house workshop facility with a team of qualified mechanics for all kinds of service for repair and maintenance to avoid downtime & loss of working works.

Customer satisfaction & value addition is always our top priority in surveying works. HSE, Engineering, Quality, Speed & Reliability are the corner stones of our business sustainability.

Committed, Dedicated & Motivated workforce is our biggest assets. We are continuously driving forward in technical ability & Methodology in line with the latest construction requirements.

VISION

To provide complete solutions & to be recognized as a company that is reliable, tailored solutions to meet customers' demands coupled with outstanding service. We always aim to provide our staff with continual training and development to bring out the best in them and provide a sustainable future.

MISSION

We consider each customer's requirements on an individual basis, providing site survey through to handover, ensuring we deliver excellent service and support throughout. We take in pride in our equipment and ensure it operates to maximum efficiency and without environmental impact. We maintain our fleet to the highest standard. Equipment is continuously renewed, meaning a modern fleet of equipment will pass efficiency savings onto the customer whilst protecting the environment.

OUR VALUES

Deliver a tailored solution to all customers. Build and maintain long-term relationships with customers. Safety is integral in any project, process, and people. The staff is friendly, professional, and knowledgeable. Innovation is an ongoing process SHUAA ALFATH has built its reputation upon its Values. We set out our behaviours, our culture and highlight how we should operate within our business. Everyone in SHUAA ALFATH understands the importance of these Values and we strive to ensure that these principles are constantly applied across our business.

OUR COMMITMENT

We consider each customer's requirements on an individual basis, providing site surveys through to handover, ensuring we deliver excellent service and support throughout.

We take pride in our equipment and ensure it operates to maximum efficiency and without environmental impact. We maintain our fleet to the highest standard.

Equipment is continuously renewed, meaning a modern fleet of equipment will pass efficiency savings onto the customer whilst protecting the environment.

CODE OF BUSINESS CONDUCT AND ETHICS

THE GROUP POLICY STATEMENT

Honesty, Respect, Trust, Customer Focus, Teamwork & Communication are the core values that distinguish SAG Group as leading Earthwork & Contracting Company.

SAG Group will conduct its business fairly, impartially, in an ethical and Proper manner & full compliance with all applicable laws and regulations. In conducting its business, integrity must undermine all company relationships Including those with customer, Suppliers, Communities and among employees.

The highest standards of ethical business conduct are required of "SAG Group" Employees in the performance of the company responsibilities.

"SAG Group" employees do not engage in conduct or activity that may raise question as to the company's honesty, impartiality or reputation or otherwise cause embarrassment to the company.

Every employee has the responsibility to ask questions, seek guidance, and report suspected violations of the Code of Conduct retaliation against employees who come forward to raise genuine concerns will not be tolerated.

ENTERPRISE RESOURCE PLANNING SYSTEM

Enterprise Resource Planning, which is commonly known by its abbreviation ERP, is the integrated suite of business application to collect, store, manage, interpret, and analyse data from many business activities. ERP software suite runs on a common database, eliminating chances for repeated data entry and duplicate data.

SHUA'A ALFATH functions on ERP software suite for integrating various departments and functional areas across the Group. This ERP software enables real time synchronization of key enterprise functionalities such as Accounts and Finance, Human Resource, Sales and Marketing, Procurement, Project Costing, Customer Relationship, and Cost Control.

This company wide integrated information system supports **SHUA'A ALFATH** Group to perform daily business activities as consistent as possible, delivering superior customer experience thus building strong brand equity.

SECTION 3

SUSTAINABILITY

CORPORATE HEALTH, SAFETY, AND ENVIRONMENTAL (HSE) STATEMENT

SHUA'A ALFATH is committed to providing a safe and healthy workplace for all persons involved in or affected by its operation.

SHUA'A ALFATH recognizes the responsibilities and requirements placed upon it by occupational health and safety legislation and will comply with all applicable laws and regulations.

We will strive to achieve our objectives by:

- Making safety an integral of our business activities.
- Introducing a risk management program to identify and control hazards.
- Ensuring that our work team is committed to our goals by providing adequate education, training, and supervision.
- Continuously reviewing the adequacy of our safety management system to ensure it remains effective.

Management is expected to fully implement our Health and Safety systems and are responsible for ensuring a safe work environment is provided for all persons under their direct control.

Management is also expected to address promptly and adequately any health and safety issues they become aware of Health and Safety.

Employees are accountable for complying with safety policies and instructions as well as reporting incidents and concerns to **SHUA'A ALFATH**. Employees shall actively participate in following procedures outlined in HSE Management Plan

SECTION 4

FINANCIAL INFORMATION

FINANCIAL INFORMATION

SHUA'A ALFATH follows the International Accounting Standards and Practices forth by IASD and produces financial statements every year. Currently **SHUA'A ALFATH** enjoys a healthy relationship and maintains international banking facilities with the following banks:

- Bank Muscat
- Ahli Bank
- Meethaq Bank

SHUA'A ALFATH realizes the importance of analysing Company's financial position and has a clear understanding of how its business is doing financially.

For us to be able to predict and plan, a thorough understanding of financial statements, is essential. A sound understanding of financial statements will:

- Identify unfavourable trends and tendencies in the operations of business.
- Monitor cash flow requirements on a timely basis and identify financing needs early.
- Monitor important indicators of financial health.
- Monitor periodic increases and decreases in the financial position.
- Monitor performance against **SHUA'A ALFATH** developed financial plan.

REGIONAL PRESENCE

SHUA'A ALFATH has earned its reputation across the various Governorates of the Sultanate of Oman for delivery of projects known for their high quality and cost effectiveness.

Based in Ghala Muscat Sultanate of Oman **SHUA'A ALFATH** is a general contracting and construction management company which specializes in design and build projects and construction work. With its experience covering everything from pre-construction services to complete turn-key construction projects.

SHUA'A ALFATH is ranked among the top Contractors in the region with its substantial experience in bringing difficult and sensitive projects to successful completion with high quality standards.

CORPORATE OBJECTIVES

SHUA'A ALFATH Group has enjoyed numerous recognized achievements within a short period of time as a **Total Solution Provider** for all types of surveying requirements by organizing our talents and resources into the subsidiary companies specialized in various field of survey works and drawings.

The corporate aim has been consistent since the launching of the Group. The Group focus and value reputation for integrity, technical excellence and customer satisfaction, as well as professional success and development of its employees.

The principal objective is to:

- Govern the uniform conduct, policies and procedures for the Group companies and ensure their compliance with them.
- To maintain and further enhance the quality of services, by introducing the most sophisticated technology and automated monitoring systems throughout the Group in each level.
- Institutionalize the corporate training programs to ensure effective development of the Staff members and through orientation of new employees.
- Improve the efforts to hire qualified and talented individuals with strong technical, management and business development credentials and vast experience to support and accelerate Groups' growth.

When these objectives are combined with Group Vision and Mission the formula for success is realized. Looking forward to the future we strive to achieve increase in our size, capabilities and our contributions to Construction industry.

SURVEYING WORKS

SURVEYING WORKS

SURVEYING WORKS

SHUA'A ALFATH is leading only earthmoving company in the Sultanate of Oman with Well trained, experienced engineers / Surveyors/technicians with the latest and highly sophisticated equipment Such as 3D laser scanners, GPS, Pulse Total Stations to meet any type of intricate survey works to comply with the needs and requirements at the very reasonable and affordable budget to the total satisfaction of the Customer.

SHUA'A ALFATH operations are widely spread over in different segments such as Roads, Mining Field, Mountain Demolition, Major Earthworks, Land Surveying, Landscaping Works etc.,

SHUA'A ALFATH provides all types if topographic survey support using the latest technologies like reflector-less total stations, real time GPS. We do all these services for Consulting Engineers, Property Developers, Utility Companies, Government Departments, Architects, Main Contactors, Planners, Infrastructure Developer, Construction Companies etc.

With team of professional Land Surveyors **SHUA'A ALFATH** can conduct following surveying services:

- **Topographic Survey**
- **Contours Survey and Mapping**
- **Establish Survey Control Networks**
- **Precise Levelling**
- **Construction Surveys**
- **Pre-Construction Surveys**
- **Establishment of Grid Lines and Datum**
- **Profile Levelling and Cross Section Surveys**
- **Measured Building Surveys**
- **An As-Built Survey**
- **Setting Out Survey**
- **CAD Services**
- **Electrical Power Line Survey**
- **Pipeline Survey**

➤ **Topographic Survey**

SHUA'A ALFATH provide topographic mapping services that supports engineering consultants in designing the roads, infrastructure and building projects. The topographic survey services help in route planning, thematic data preparation, and decision-making for telecom and transport services and disaster management. We are indeed proud to mention that we conduct all our data collection moving on foot to ensure maximum accuracy unlike the practice of affixing the device on motor vehicles in the process. Our services include creating comprehensive topographic maps and 3D topographic maps to the specified projection parameters, including generating contours. Our survey records all features visible above ground including the position of the street furniture, road lines, buildings, services, contours, embankments, vegetation etc. We are using latest surveying equipment's for our projects including Trimble R8 & R4 GPS units, Stonex R20 Total Stations in the data collection.

➤ **Contours Survey and Mapping**

A civil engineer studies the contours and finds out the nature of the ground to identify suitable site for the project works to be taken up. By drawing the section in the plan, it is possible to find out profile of the ground along that line. It helps in finding out depth of cutting and filling if formation level of road/railway is decided. Intervisibility of any two points can be found by drawing profile of the ground along that line. The routes of the railway, road, canal, or sewer lines can be decided so as to minimize and balance earthworks. This study is very important in locating bunds, dams and to find out flood levels.

➤ **Establish Survey Control Networks**

We establish survey control networks which consist of stable, identifiable points tied together by extremely accurate observations. The control stations can be adjusted to millimetre accuracy, which allows for precise stations to be in place throughout the construction activities. The control network can be produced using traditional Total Stations and traverse methods and Least Squares calculations. If the site stretches over a vast area, we can offer Post processing GPS observations to establish the control network. This can be done to millimetre accuracy by collecting GPS observations using a static receiver. We offer static observation to establish national control networks and even measurement of boundary markers between nations.

➤ **Precise Levelling**

Precise levelling is a fast, very cost effective and highly accurate method for detecting even the smallest changes in elevation associated with any site activity. Precise levelling techniques have also been used in testing environments, particularly where the effect of stress on a structure needs to be determined. Strategically placed precise level points can correctly and precisely determine the extent of settlement on any structure.

➤ **Construction Surveys**

The basic motive of the so-called construction surveys is to stake out reference points as per the design that will guide the construction of newly designed/planned structures or buildings. These services are of great assistance to check manual errors from creeping in during various stages of execution of a designed construction at site, launching of constructed ship from dry dock, Verticality and tilt check for high rise buildings etc.

➤ **Pre-Construction Surveys**

A pre-construction survey is the depiction of existing condition of the target site and neighbouring infrastructure prior to the commencement of a construction design activity. This survey provides the client with an accurate database about the condition of the area. This survey is also undertaken as a tool for asset mapping at the site.

➤ **Establishment of Grid Lines and Datum**

Setting out of grid lines and datum using Electronic Digital Measurement-Preferably Total Stations has become an indispensable activity in planned construction modules these days. The high-end Total Stations assures highest precision setting out of framed structures, mostly in case of high-rise buildings. We offer our services to the contractors of even smaller projects as third-party services in establishing the grid lines on every floors so that the verticality can be maintained effectively. We serve many contractors in and around Dubai for setting up of grid lines as in many cases the angular dimensions of plot limit in drawings may differ from the site conditions. We identify the issues from site and inform the clients about the actual situation and supports them to match the drawings with site condition and thus save their precious time and money.

➤ **Profile Levelling and Cross Section Surveys**

Profile levelling (Longitudinal sectioning) is the process of determining the elevations of points at short, measured intervals along a fixed line such as central line of a railway, highway, canals or sewer. Cross sections are run transverse to the longitudinal profile and on either side of it at regular intervals to obtain lateral outline of the ground surface. This ends up in providing data for estimating quantities of earthwork and other purposes like identifying the relationship between existing ground surface and the levels of the proposed design.

➤ **Measured Building Surveys**

Also called dimensional surveys, measured building surveys are mostly aimed at exact measurement of interior and exterior dimensions of something that is already built, prepare an architectural plan, section, elevation based on the findings mostly for alteration and extension of the existing structure.

➤ **An As-Built Survey**

An as-built survey is normally performed to compare the position and dimension of a constructed feature compared to its designed dimensions and position. As-built surveys form a vital part of the quality control in any construction project. As-built survey reports are sometimes resorted to as and when some issue regarding contractual obligations arise.

➤ **Setting Out Survey**

A setting out survey involves marking of a physical feature that appears on an engineering plan in its design position on ground. Conventional setting-out techniques that make use of plumb lines etc. are majorly error prone, especially in the case of high-rise buildings, complicated structures and buildings having larger ground area. Hence, all major works today resort to Electronic Distance Meter (EDM) measurements. We own a large collection of precise Total Stations to support the setting out services.

Under Ground Services Survey:

➤ **Electrical Power Line Survey**

SAG provides electrical power line survey services. Our experience with power lines ranges from pre-designed topographical surveys and preparation of longitudinal profile for route mapping, tower spotting, through construction stake out and as-built survey.

➤ **Pipeline Survey**

We provide survey data on all types of pipelines including Gas, Oil, Water and Sewers. As per our Client's requirement we are committed to provide all details of pipe sizes and materials, manhole size & location and inverts or obverts of pipelines in fully annotated and coordinated survey plans.

➤ **CAD Services**

SHUA'A ALFATH provides all design data with the aid of latest land development AutoCAD software. We provide hardcopy and softcopy in Pdf, DWG, JPEG formats to our clients.

شهادة السجل التجاري
Commercial Registration Certificate

CR Number 1163051

رقم السجل التجاري 1163051

Note:

ملاحظات:

This certificate is digitally signed.

هذه الشهادة موقعة رقمياً.

This certificate has been signed and certified using a Digital Signature Certificate as specified under The Electronic Transactions Law of the Sultanate of Oman issued by His Majesty's Royal Decree (69/2008).

تم توقيع وإصدار هذه الشهادة باستخدام ختمية الشهادات الموقعة رقمياً وفقاً لما هو وارد في قانون المعاملات الإلكترونية السلطانية الصادر بموجب المرسوم السلطاني رقم (2008/69).

To check the validity and authenticity of the digitally signed documents and certificates, please check the online service of National Digital Certification Center at (www.oman.om/ncc).

يرجى التحقق من صلاحية ومصداقية المستندات والشهادات الموقعة رقمياً عن طريق الخدمات الإلكترونية المقدمة من المركز الوطني للتصديق الإلكتروني وذلك عبر الرابط (www.oman.om/ncc).

The information in this commercial registration is registered based on the Commercial Registration Law No. (3/1974). The commercial registration owner is obligated to obtain the approval of the competent authorities before the commencement of any economic activity when the activity is restricted by prior consent, including the introduction and operation of foreign labor force.

تم قيد المعلومات بهذا السجل بموجب قانون السجل التجاري رقم (3/1974). ويستلزم على ملكه الحصول على موافقة الجهات المختصة قبل مباشرة أي نشاط اقتصادي متى كان النشاط مقيداً بموافقة مسبقة بما في ذلك استقدام وتشغيل القوى العاملة الوافدة.

This certificate proves that this commercial registration has a membership of Oman Chamber of Commerce and Industry for only one year from registration date.

شهادة السجل التجاري تثبت أن هذا السجل ملتبس لغرفة تجارة وصناعة عمان لمدة عام واحد فقط من تاريخ التسجيل.

The Commercial Registration and the CR certificate are not considered as an approval or a warranty for a license of bringing in labour.

لا يعتبر تسجيل السجل التجاري وشهادة السجل التجاري موافقة أو ضماناً للحصول على ترخيص باستقدام قوى عاملة وافدة.

The Commercial Registration does not grant an approval or a guarantee for obtaining an investor's residence permit in the Sultanate of Oman.

لا يعتبر هذا السجل التجاري موافقة أو ضماناً للحصول على ترخيص إقامة المستثمر بالسطنة.

The Commercial Registration is not considered as an approval or a warranty for a license of bringing in labour.

لا يعتبر هذا السجل التجاري موافقة أو ضماناً للحصول على ترخيص باستقدام قوى عاملة وافدة.
